

GloFAS Part 4: Normalmodel comparison

Last 30 historical dates and 28 issued horizons; fitted log1p scale; black/purple lines are observed/scoring-only truth

Normal Ridge
CRPS 0.8062 | 90% cover 25.0%

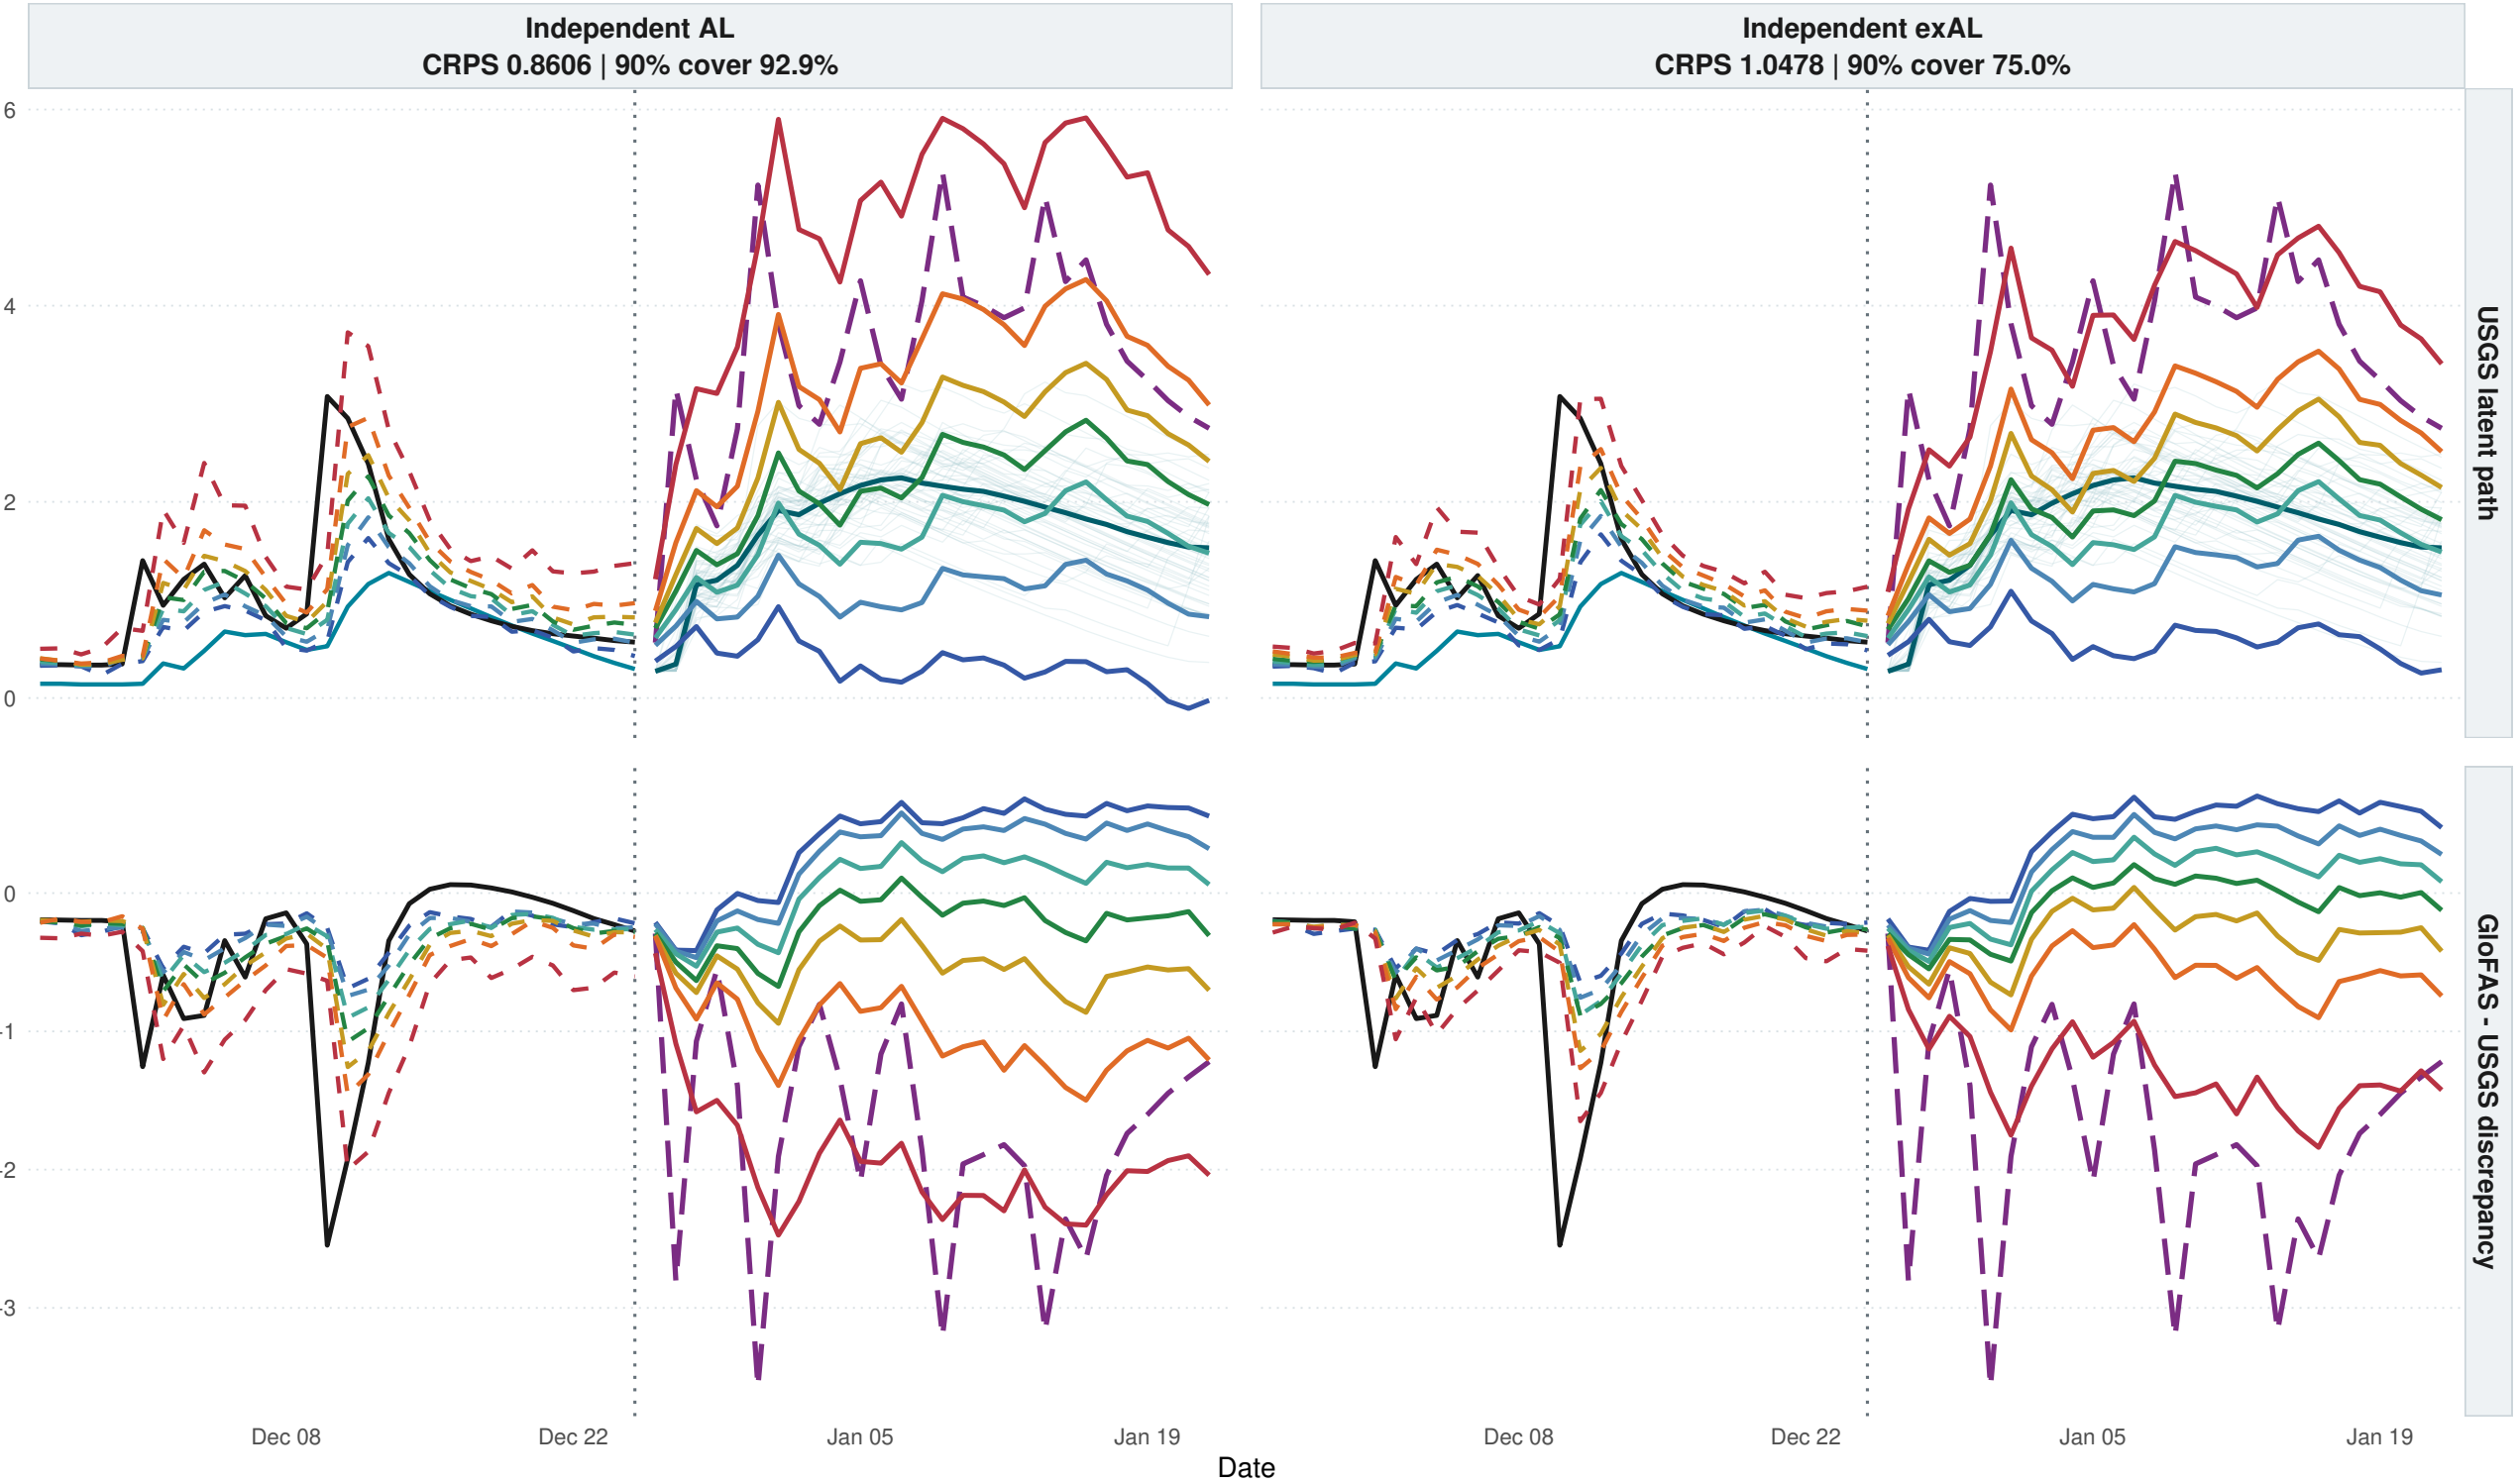

Normal RHS/VB
CRPS 0.9412 | 90% cover 17.9%

GloFAS Part 4: independent quantile comparison

AL and exAL RHS/VB fits; dashed historical fits and solid issued-window latent paths; no crossing correction

Quantile 0.05 0.2 0.35 0.5 0.65 0.8 0.95

GloFAS Part 4: joint quantile comparison

Joint AL uses the Sweep 10 cap-stabilized state; Joint exAL is a nonconverged sensitivity result

Quantile 0.05 0.2 0.35 0.5 0.65 0.8 0.95
